1 Safety and Regulatory Information 13
1.1 Safety instructions 13
1.2 Labels on R&S SMB 15
1.3 Warning Messages in the Documentation 16
1.4 Korea certification class B 16
2 Welcome to the R&S SMB 17
2.1 Key Features 17
2.2 Documentation overview 17
2.2.1 User manual and help 17
2.2.2 Data sheets and brochures 17
2.2.3 Release notes and open source acknowledgment (OSA) 18
2.2.4 Application notes, application cards, white papers, etc. 18
2.3 Typographical conventions 18
2.4 Notes on screenshots 18
3 Getting Started 20
3.1 Preparing for Use 20
3.1.1 Lifting and Carrying 20
3.1.2 Unpacking and Checking 20
3.1.3 Choosing the Operating Site 20
3.1.4 Setting Up the R&S SMB 21
3.1.4.1 Placing the R&S SMB on a Bench Top 21
3.1.4.2 Mounting the R&S SMB in a Rack 22
3.1.5 Considerations for Test Setup 23
3.1.6 Connecting to Power 24
3.1.7 Connecting to LAN 24
3.1.8 Connecting to IEC 625/IEEE 488 (GPIB) 25
3.1.9 Connecting USB Devices 25
3.1.10 Connecting to RF 26
3.1.11 Connecting to Ref In/Ref Out 27
3.1.12 Switching On or Off 27
3.1.13 Default Settings 29

3.1.14 Working with Linux Operating System 30
3.1.15 Setting Up a Network (LAN) Connection 30
3.1.15.1 Assigning the IP Address 30
3.1.15.2 Using Computer Names 31
3.1.16 Remote Access via an External Controller 32
3.1.16.1 Using a Web Browser for Remote Access 33
3.1.16.2 Remote Access via a VNC Client Software 34
3.1.17 LXI Configuration 39
3.1.17.1 LXI Browser Settings 40
3.1.17.2 LAN Configuration 42
3.2 Instrument Tour 48
3.2.1 Front Panel Tour 48
3.2.1.1 Utility Keys 49
3.2.1.2 Standby LEDs and Standby Key 49
3.2.1.3 Display 50
3.2.1.4 Setup Keys 50
3.2.1.5 Keypad for data entry 51
3.2.1.6 Rotary Knob and Navigation Keys 52
3.2.1.7 Front Panel Connectors 53
3.2.2 Rear Panel Tour 54
3.2.2.1 Description of the Connectors 55
3.3 Trying out the Instrument 57
3.4 System Overview 62
3.4.1 Brief Introduction to the Instrument's Concept 62
3.4.2 Signal Flow at a Glance 62
3.4.3 Application Field of the Instrument 63
3.4.4 Description of Individual Diagram Blocks 63
3.5 Instrument Control 66
3.5.1 Manual Operation 66
3.5.1.1 Legend of Manual Controls 66
3.5.1.2 Key Elements 69
3.5.1.3 Display 71
3.5.1.4 Accessing Dialogs 76

3.5.1.5 Setting Parameters 77
3.5.1.6 Editors 83
3.5.1.7 How to Use the Help System 85
3.5.1.8 File Management 86
3.5.1.9 Legend of Front-Panel Controls 90
3.5.2 Remote Control 92
3.5.3 Remote Access 92

4 Instrument Function 94
4.1 Overview of Instrument Functions 94
4.2 General Instrument Settings 95
4.2.1 Overview of General Instrument Settings 95
4.2.2 Default Instrument Settings - Preset Key 96
4.2.3 General Configuration of Instrument - Setup Key 97
4.2.3.1 Hardware Config 97
4.2.3.2 Software / Options 98
4.2.3.3 Manage License Keys 100
4.2.3.4 NRP Info/Update 101
4.2.3.5 SMZ Info Update 103
4.2.3.6 Display Update 103
4.2.3.7 Shutting Down and Rebooting the Instrument 104
4.2.3.8 Network Settings 104
4.2.3.9 Display/Keyboard Settings 108
4.2.3.10 Remote Channel Settings 109
4.2.3.11 Instrument Emulations 110
4.2.3.12 LXI Status 112
4.2.3.13 Protection 113
4.2.3.14 Security 114
4.2.3.15 Save/Recall 122
4.2.3.16 Factory Preset 122
4.2.3.17 Help 122
4.2.4 Switching to Manual Control - Local Key 123
4.2.5 Generating a Hard Copy of the Display 123
4.2.5.1 Hard Copy Settings 123

4.2.5.2 Hard Copy Options....124
4.2.6 Messages - Info Key....126
4.2.7 Help System - Help Key....126
4.2.8 Storing and Loading Instrument Data - File Key....127
4.2.8.1 Save/Recall Menu....128
4.2.8.2 Saving Instrument Settings....128
4.2.8.3 Loading Instrument Settings....130
4.2.8.4 File Manager....132
4.2.8.5 Accessing the File System of the Instrument and Transferring Files from and to the Instrument....133
4.3 RF Block....136
4.3.1 Overview of RF Signal....136
4.3.1.1 RF Output....136
4.3.1.2 RF Signal Modes and Characteristics....137
4.3.2 RF Frequency....138
4.3.2.1 RF Frequency vs. RF Output Frequency....138
4.3.2.2 Setting the RF Frequency....139
4.3.2.3 RF Frequency Dialog....139
4.3.2.4 Frequency Settings....140
4.3.2.5 User Variation Settings....141
4.3.3 Phase....142
4.3.3.1 Phase Settings....142
4.3.4 Reference Oscillator....142
4.3.4.1 Reference Oscillator Settings....144
4.3.5 RF Level....146
4.3.5.1 Overview of RF Level....146
4.3.5.2 RF Level Dialog....148
4.3.5.3 Power-On/EMF Settings....153
4.3.5.4 Automatic Level Control - ALC....153
4.3.5.5 NRP Level Control....155
4.3.5.6 User Correction....159
4.3.5.7 Reverse Power Protection....167
4.3.6 RF Measurement....167
4.3.6.1 NRP Sensor Mapping....167

4.3.6.2 NRP Power Viewer....170
4.3.7 RF Sweep and List Mode....178
4.3.7.1 Overview....178
4.3.7.2 RF Frequency Sweep....179
4.3.7.3 RF Level Sweep....187
4.3.7.4 List Mode....192
4.4 Modulation....201
4.4.1 Overview of Modulation....201
4.4.1.1 Enabling/Disabling Analog Modulations using the MOD On/Off Key....202
4.4.1.2 Modulation Sources....202
4.4.2 Amplitude Modulation (AM)....204
4.4.2.1 Amplitude Modulation Settings....204
4.4.3 Frequency Modulation (FM)....207
4.4.3.1 Frequency Modulation Settings....208
4.4.4 Phase Modulation (PhiM)....211
4.4.4.1 Phase Modulation Dialog....211
4.4.5 Pulse Modulation (PM)....214
4.4.5.1 Pulse Modulation Settings....215
4.4.6 Stereo Modulation....217
4.4.6.1 Stereo Modulation Dialog....217
4.5 Modulation Generator and LF Output....223
4.5.1 Overview of LF Generator....223
4.5.2 LF Output....224
4.5.2.1 LF Output Dialog....224
4.5.3 LF Frequency Sweep....225
4.5.4 Pulse Generator....231
4.5.4.1 Pulse Generator Settings....231
4.5.4.2 Pulse Train Generation....235
5 Remote Control Basics....240
5.1 Remote Control Interfaces and Protocols....240
5.1.1 VISA Libraries....241
5.1.2 Messages....241
5.1.3 LAN Interface....242

5.1.3.1 HiSLIP protocol 244
5.1.3.2 VXI-11 protocol 244
5.1.3.3 Socket communication 244
5.1.3.4 LAN interface messages 245
5.1.4 USB Interface 245
5.1.5 Serial Interface 246
5.1.6 GPIB Interface (IEC/IEEE Bus Interface) 246
5.1.6.1 GPIB interface messages 247
5.1.6.2 GPIB Instrument Address 248
5.1.7 LXI Browser Interface 248
5.2 Starting a Remote Control Session 249
5.2.1 Switching to Remote Control 249
5.2.2 Returning to Manual Operation 250
5.2.3 Examples 250
5.2.3.1 Remote Control over GPIB 251
5.2.3.2 Remote Control over LAN using VXI-11 Protocol 251
5.2.3.3 Remote Control over LAN using Socket Communication 256
5.3 SCPI command structure 263
5.3.1 Syntax for common commands 263
5.3.2 Syntax for instrument-specific commands 264
5.3.2.1 Long and short form 264
5.3.2.2 Numeric suffixes 264
5.3.2.3 Optional mnemonics 265
5.3.3 SCPI parameters 265
5.3.3.1 Numeric values 266
5.3.3.2 Special numeric values 266
5.3.3.3 Boolean parameters 267
5.3.3.4 Text parameters 267
5.3.3.5 Character strings 268
5.3.3.6 Block data 268
5.3.4 Overview of syntax elements 268
5.3.5 Structure of a command line 269
5.3.6 Responses to queries 270

5.4 Command Sequence and Synchronization ... 271
5.4.1 Preventing overlapping execution ... 272
5.5 Status reporting system ... 273
5.5.1 Hierarchy of the status registers ... 273
5.5.2 Structure of a SCPI status register ... 275
5.5.3 Status byte (STB) and service request enable register (SRE) ... 277
5.5.4 Event status register (ESR) and event status enable register (ESE) ... 278
5.5.5 Questionable status register (STATus:QUEStionable) ... 278
5.5.6 Operation status register (STATus:OPERation) ... 279
5.5.7 Application of the status reporting system ... 279
5.5.7.1 Service request ... 279
5.5.7.2 Serial poll ... 280
5.5.7.3 Query of an instrument status ... 280
5.5.7.4 Error queue ... 280
5.5.8 Reset values of the status reporting system ... 281
5.6 General programming recommendations ... 281

6 Remote Control Commands ... 283
6.1 Conventions used in SCPI command descriptions ... 283
6.2 Common commands ... 284
6.3 Preset Commands ... 288
6.4 CALibration Subsystem ... 290
6.5 DIAGnostic Subsystem ... 292
6.6 DISPlay Subsystem ... 294
6.7 FORMat Subsystem ... 297
6.8 HCOPy Subsystem ... 299
6.9 KBOard Subsystem ... 304
6.10 MMEMory subsystem ... 305
6.10.1 File naming conventions ... 305
6.10.2 Extensions for user files ... 306
6.10.3 Examples ... 306
6.10.4 Remote control commands ... 308
6.11 OUTPut Subsystem ... 314
6.12 SENSe, READ and INITiate Subsystems ... 318

6.13 SOURce Subsystem....330
6.13.1 SOURce:AM Subsystem....331
6.13.2 SOURce:CORRection subsystem....334
6.13.3 SOURce:FM Subsystem....343
6.13.4 SOURce:FREQuency Subsystem....346
6.13.5 SOURce:INPut Subsystem....353
6.13.6 SOURce:LFOutput Subsystem....354
6.13.7 SOURce:LIST Subsystem....364
6.13.8 SOURce:MODulation Subsystem....376
6.13.9 SOURce:PGEN Subsystem....377
6.13.10 SOURce:PHASe Subsystem....378
6.13.11 SOURce:PM Subsystem....378
6.13.12 SOURce:POWer Subsystem....382
6.13.13 SOURce:PULM Subsystem....392
6.13.14 SOURce:ROSCillator Subsystem....409
6.13.15 SOURce:STEReo Subsystem....412
6.13.16 SOURce:SWEep Subsystem....421
6.14 STATus subsystem....433
6.15 SYSTem Subsystem....437
6.16 TEST Subsystem....456
6.17 TRIGger Subsystem....457
6.18 UNIT subsystem....463
6.19 Direct Commands for the Stereo/RDS Coder Option R&S SMB-B5....464
6.19.1 Remote-Control Commands....464
6.19.2 Examples....485
6.19.2.1 Alternative Frequency Lists....485
6.19.2.2 Enhanced Other Networks....486
6.19.2.3 Free Format Groups (FFGs)....487
6.19.2.4 Transparent-Mode....488
7 Transporting....489
8 Maintenance, Storage and Disposal....490
8.1 Cleaning....490
8.2 Changing Fuses....490

8.3 Storage....491
8.4 Performing Maintenance Tasks....491
8.4.1 Date and Time....491
8.4.2 Check Front Panel....492
8.4.2.1 Check Front Panel Settings....493
8.4.2.2 Performing the Front Panel Tests....493
8.4.3 Internal Adjustments....494
8.4.3.1 Internal Adjustments Settings....495
8.4.3.2 Performing Internal Adjustments....496
8.4.4 Selftest....497
8.5 Disposal....498

9 Status Information, Error Messages and Troubleshooting....499
9.1 Status Information....499
9.1.1 Status information displayed between the frequency and level fields....499
9.1.2 Status information displayed to the left of the Info line....501
9.1.3 Status information displayed in the Info line....501
9.2 Error Messages....502
9.2.1 Volatile messages....502
9.2.2 Permanent messages....503
9.3 SCPI-Error Messages....503
9.4 Device-Specific Error Messages....503
9.5 Resolving network connection failures....505
9.6 Measuring USB Cable Quality....506
9.7 Obtaining Technical Support....506
9.8 Contacting customer support....507

Annex....508

A Hardware Interfaces....508
A.1 GPIB Bus Interface....508

List of commands....510

Index....520
