

### Accessing the online help in the check front panel dialog or exiting via ESC

During the test, the actual functions of all keys are disabled, including the [help] and the [esc] keys.

#### 8.4.2.1 Check Front Panel Settings

- To access this dialog, Press the "setup" key and select "Setup > Test > Check Front Panel".

Preset	Roll l.	Roll r.	
Help	Roll click		ESC
	Up		Diagr
	Left	Right	Mod
	Down		RF
Local	Freq		
Setup	Level	7	8
File	Toggle	4	5
Info	Back	1	2
Winbar		0	.
			+/-
			*1

Reflecting the front panel, the "Check Front Panel" dialog contains all functions to test the operating elements of the instrument.

#### 8.4.2.2 Performing the Front Panel Tests

To perform the front panel test, you operate the keys at the front panel, and check the response of the instrument in the "Check Front Panel" dialog. To perform this test properly, it is essential that you check each key of the front panel. The test is only completed, when you have verified all keys.

During the test, the actual functions of the keys are disabled.

Proceed as follows:

1. Press the [setup] key.
  2. Select "Test > Check Front Panel"  
The "Check Front Panel" dialog opens.
  3. Press a key on the front panel.  
Check if the corresponding key in the "Check Front Panel" dialog turns green.
  4. Press the same key a second time.  
Check that the key in the dialog turns red.
- Note:** Pressing the same key again has no further effect, with the exception of the [esc] key, see [Press the ESC key a third time](#).
