#### 4.2.8.4 File Manager

The "File Manager" is a tool very similar to a standard Windows Explorer and helps you manage mass storage media and files saved on the R&S SMB.

You can perform the following tasks:

- Copying multiple files from disk to other media and vice versa, see Chapter 4.2.8.5, "Accessing the File System of the Instrument and Transferring Files from and to the Instrument", on page 133
- Copying files into another directory, see Copy and Paste
- Renaming and deleting files, see Rename and Delete
- Creating new directories on the follwoing drives:
  - hard disk
  - internal flash memory
  - memory stick

  See Create New Directory

For more information, see "File Manager" on page 88.

File Type
Selects the file type to be listed. If you select a file type with a specific file extension, only files with this extension are listed in the directory.

Remote command:
n.a.

Directory and File Name
Selects the directory in which the file to be deleted or copied is located. The dialog lists all files in this directory. Selected files are highlighted. The path is indicated above the directory window.

Unlike the "Save/Recall" and "File Select" dialogs, the "File Manager" displays the full file names including extensions.

Remote command:
:MMEMory:CDIRectory on page 309
